

PROVIDING CONTRACT EXPERTISE AND PROCESS

Situation

A mining company had no consistent source of expertise to advise on contract issues and no clear and consistent process for entering into agreements.

Solutions

Morae Global:

- Placed a senior Morae attorney with the company to bring consistency and experience to the contracting process. This attorney drew upon the right subject matter experts based on the skills needed and the time frame to address the range of issues that are part of running a major business.
- Assisted the company to develop a companywide process for negotiating and entering into the agreements needed to operate its business effectively.

Benefits

Our dedicated, yet flexible solution allowed the company to adjust its resources (up and down) to match workload needs. Additionally, the implementation of a companywide process for negotiating and entering into agreements resulted in efficiencies through a reduction in workload.
