

eDISCOVERY MANAGED SERVICES

Improving the speed and reducing the cost of information and discovery management are our passion. We are experts in information governance.

Morae Global's professionals have the vision, experience, skills and knowledge of technology and operations to deliver at the highest legal levels of service throughout the entire electronic discovery and document review life cycle, providing clear and measurable quality and metrics. Building on the typical approach to discovery, our professionals can assist with the entire information cycle, including governance and records compliance.

Challenging the typical EDRM-based linear approach, our professionals rely on early analytics, streamlining document reviews and minimizing required resources throughout the project. Our methodology is designed to leverage predictive coding and other analytical tools to minimize volume, cycle time and cost while increasing measurable quality. Our professionals develop strategies based on particular experiences using tried-and-tested technologies, resulting in custom, cost-effective solutions and optimum performance.

Our new eDiscovery Service Bureau is a fully cloud-based solution that provides end-to-end discovery services from collection through data management and document review. We offer a range of deployment, professional services and pricing models and we are so confident in our ability to deliver results for you that **we guarantee savings on your current discovery spend.**
