- **iManage Insight:** Enterprise content search and analysis
- **iManage Govern:** Archiving, Records, Threat detection and Security Policy Management

MANAGE ALL CLIENT WORK PRODUCT IN SINGLE UNIFIED ELECTRONIC MATTER FILES BY CLIENT AND ENGAGEMENT

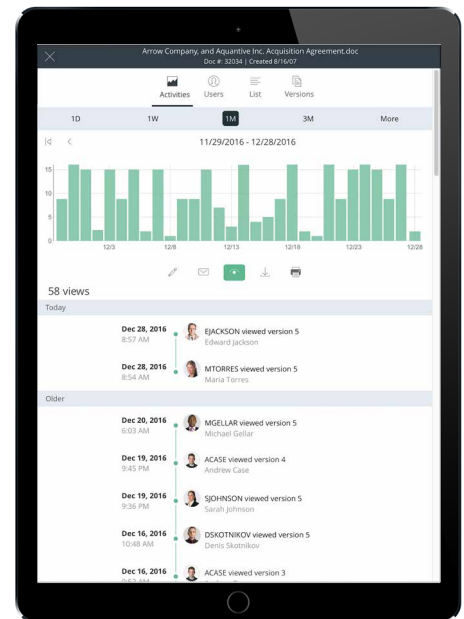

Manage communications and content, securely, in unified workspaces

Email is the primary work product and means of collaboration for many professionals. With iManage Work, you can manage emails and document attachments side by side with other work product, improving productivity and saving valuable billable time. Seamless integration with Microsoft Office 365, Gmail and Lotus Notes makes emails that are typically isolated in individual in-boxes part of the shared and governed engagement file. iManage Work also speeds the filing process by learning your filing habits and suggesting appropriate locations or devices without the typical delays in moving emails, or automatically filing emails based on conversations. Integration with other leading productivity tools, including Adobe Acrobat, and enterprise portals, such as Microsoft SharePoint, further extends the productivity benefits of iManage Work.

Smart features make professional work more productive

iManage Work uses elements of AI, machine learning and big data analysis to anticipate your needs-, and enable you to work more intuitively and efficiently to deliver the best client work.

- **Smart Worklists:** Screen displays adapt to show you an overview of relevant documents, emails, matters and clients based on events important to you as a professional. Documents edited by others are easy to spot, so you can see what has been updated.
- **Smart Document Preview:** Large documents on mobile devices download quickly to the page you want, so work doesn't slow down. When you access a previous version, it opens to the same page, anticipating that is probably what you need to review.
- **Smart Timeline:** A visual history of a document across versions shows peaks and valleys that expose critical points in the document/ matter lifecycle, by user activity (Edit, View, Print), for easy visualization and better decision making.

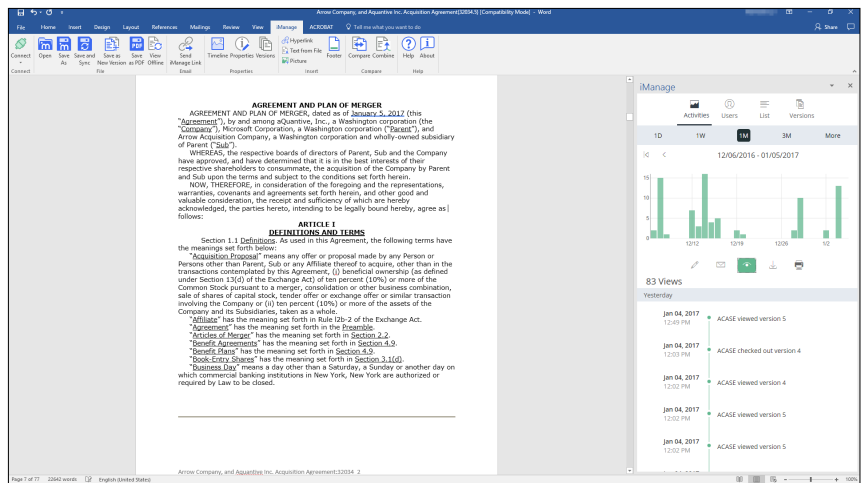

Document timelines keep professionals “on top” of their constantly changing work

- **Smart help** provides simple and useful help to users when and where they need it.

Work in Microsoft Office, Office 365 Outlook and more

iManage Work 10 fully integrates with Microsoft Office, including Office 365. Manage emails and documents, even client collaboration—all from within the familiar Outlook folders. Incoming emails are analyzed and, based on analytics, the system suggests a filing location so you can file emails with just a single click. Previously filed emails are clearly marked, so you don't waste time filing what your colleagues have already filed. You save files directly into iManage from the "save" command in Office and Office 365.

Support for co-authoring allows you to checkout a document for co-authoring and invite specific individuals to contribute, ensuring that one individual has complete control over the versioning process. Collaboration is quick, efficient and audited in the original document.

*iManage Work 10 features, like **Smart Timelines**, are integrated into Office 365 so you can work more productively in the software you prefer*

Share securely with internal and external collaborators

Add iManage Share to iManage Work and enable your project teams to collaborate with internal or external parties quickly and easily. Replace risky emails and attachments with secure, governed links to content; create collaborative workspaces that appear as folders inside the matter file and with a single click set up and share information with a client from inside the iManage Work interface.

Simplified Administration and Monitoring – Reduced TCO, Enhanced IT Agility

iManage Work includes iManage Control Center with a web-based administrative console to manage most core functionality, from anywhere across any device, including user and group management, recovering overwritten or deleted documents, and standard reporting to improve your organization's agility and reduce costs.

Enhanced Cloud Services

iManage Work is available on the enhanced iManage Cloud Services platform, the first and only cloud service to bring proven technology relied upon by Internet leaders such as Google, Facebook and Twitter to the legal/professional community for document and email management. Cloud users benefit with continuous upgrades, zero downtime for maintenance, extensive scalability and sustainable performance from anywhere, integrated analytics to intelligently monitor and protect all data from unauthorized or malicious access, and data encryption for data at rest and in motion using customer managed encryption keys.

Part of the iManage Work Product Management Platform

iManage Work is part of the iManage Work Product Management platform, a set of robust applications built on top of common communications, administration, web services and other resources enabling you to quickly deploy and implement iManage within your organization.

The iManage platform features:

- **Common REST API** for easier cloud-cloud integration
- **Common services** including OCR, previewing and indexing technologies
- **Unified administration – iManage Control Center**
- **Extensibility and agility** deliver to the iManage cloud with continuous innovation and development

Deploy on premises or in the iManage Cloud

iManage Work Product Management may be deployed on-premises or delivered as a modern, elastic cloud service on the iManage Cloud. Now, organizations of all sizes can get access to the industry-leading functionality of iManage on an annual subscription basis.
