

Phoenix Importer

Phoenix Importer enables firms to import large volumes of content into the iManage Work Document Management System. Its powerful server-based engine allows administrators and end-users to import email, documents, and entire folder structures via its intuitive, web-based interface.

Importer supports smart rule-sets for complex, automated imports and can maintain folder structures from workspaces or the iManage system.

Importer can also readily import email from PSTs, Exchange public folders, and end-user inboxes directly into iManage Work.

Features

- Import Documents and Folders into iManage Work directly from network shares or removable storage
- Import from Microsoft Exchange Email Stores and Outlook PST folders with
- Dynamic, intuitive, wizard-driven interface guides users through the import process
- 'Set and Forget' scheduling with ability to apply priority to specific jobs
- Activity reporting and job completion notification to alert on status of import jobs and highlight exceptions or potential issues
- Comprehensive, built-in guidance notes, help functionality, and documentation
- Granular options enable users to specifically include or exclude certain folders or file types during import as well as control folder creation
- Full language pack integration to display the user interface in English, French, German, Chinese (Simplified and Traditional), Spanish, and Russian

Product Summary Checklist

- ✓ Seamless Integration with iManage Work
- ✓ Import from folders, file shares, and email stores
- ✓ Full Reporting and Monitoring
- ✓ Scheduled and Real Time Processing
- ✓ Integration with other Phoenix iManage Work Management Products
- ✓ Wizard-driven, web-based functionality

Phoenix Exporter

Phoenix Exporter enables firms to export large sets of content from the iManage Work Document Management System. Exporter is integrated with iManage FileSite and DeskSite and allows the user to export one or more Workspaces to the file system and maintain the Workspace structure.

Features

- Export Documents and Folders from iManage Work to the file system
- Choose one or more Workspace to export at a time
- Maintain the Workspace folder structure when exporting content or flatten if desired
- Option to folder export to a date range
- Option to only export the latest version
- Granular options enable users to specifically include or exclude certain folders during export
- Retain the iManage Last Edit Date on the exported content
- Automatically truncate the document name if required
- Ability to also export metadata to XML for exported content

Product Summary Checklist

- ✓ Seamless Integration with iManage Work
- ✓ Export from iManage Workspaces or folders
- ✓ Full iManage auditing on exported content
- ✓ Wizard-driven, web-based functionality
- ✓ Remembers previous settings, so repeated exports are quick and simple

Benefits

- Exporting and preserving the Workspace folder structure aids familiarity
- Saves time performing mass exports of one or more Workspace at a time
- iManage history updated for compliance
- Granular exports give the user control
- Control and limit what content is exported
